

What are the advantages of a hair analysis?

A hair analysis

- ...ends the guesswork as to what the horse is suffering from
- ... saves money and time when searching for diseases at random
- ... helps to treat a horse individually and precisely
- ... avoids wrong therapeutic approaches
- ... helps to get the horse fit again as quickly as possible
- ... provides reasons why a horse cannot currently take part in a competition
- ... proves why a horse performed poorly in the competition
- ... gives tips on which feed components are not well tolerated
- ... shows not only current, but in some cases also past illnesses / operations / injuries
- ... discloses drug exposure
- ... reflects the mental state of the horse (depression, stress, anxiety etc.)
- ... can represent the horse's performance potential (winning horse?)
- ... scans the entire body, not just a specific organ
- ... can be used for several years
- ... and much more

**You have no idea,
what is wrong with your horse?**

You can help your horse!

How reliable is a hair analysis?

There are various methods of hair analysis. The method on which our analysis is based has been around for over 70 years and was awarded the Nobel Prize in 2011.

What can a hair analysis determine?

Our hair analysis can

- ... identify the cause(s) of an illness / behavior from more than 4,000 symptoms
- ... give indications of an impending illness / danger (e. g. hairline fracture in bones, blood vessels e. g. aorta etc.)
- ... recognize chronic diseases / hereditary diseases
- ... accurately assess the state of health und vitality of the horse / human / dog
- ... determine the mental state
- ... indicate whether the horse's saddle fits correctly
- ... name exactly which vertebra is blocked

Your request is not listed?

Give us a call! We will be happy to answer your questions.

How does a hair analysis work?

Effort for you:

- cut off 8 - 10 hairs close to the horse's mane (hair root is not needed); in humans, head hair / body hair
- pack the hair sample in an envelope / bag and send it to the address overleaf (only state the name of the horse / person)
- note the sender's contact details on the letter (phone and / or e-mail etc.)

Effort for the laboratory / therapist:

- after receipt of the hair sample, the receipt is confirmed by the laboratory
- the hair is analyzed using a laboratory device
- the results are evaluated by specialist personnel
- compilation of the results in a comprehensible form for the client
- conducting a telephone or personal discussion of the results (approx. 30 – 45 minutes)
- develop therapy recommendation
- handling over the test result to the client

What services does our laboratory provide?

Our laboratory can

- recommend individual medication for the therapy (incl. therapy plan)
- determine the best possible medication for the patient based on the hair analysis
- information on the effectiveness / tolerability of medication give
- test feed for compatibility
- ...

Guarantee:

If a detailed analysis is required after the first analysis, e. g. for a specific organ, this is free of charge as part of the initial analysis.
